Dear District Court Judge,

Microsoft is company that competes in a free market. I made the choice to buy their products. Microsoft is successful because they currently make the best product on the market. This does not mean that they will always be this successful. If another company comes out with a better product people will buy it. Remember how powerful IBM used to be.

Don't punish Microsoft's success; you will only be lowering the bar for Microsoft's competitors and hurting the consumer. This lawsuit is immoral and I order you to stop it.
